UNIT

YOUR PERSONAL DECENTRALIZED COMPUTER

MARCH 2023

PROBLEMS

LACK OF ADOPTION.

One major reason is the complexity of blockchain technology.

SCALABILITY.

Blockchain full potential is yet to be fully realized.

SECURITY AND PRIVACY.

Blockchain's transparency can be a privacy concern.
INTEGRATION WITH LEGACY SYSTEMS.

Integrating blockchain with Web 2.0 is a challenge.

ENERGY CONSUMPTION.

Blockchain is criticized for its high energy consumption.

POSSIBLE SOLUTION

## A BLOCKHAIN WHERE FULL POTENTIAL IS REALIZED:

| USER-FRIENDLY	ALL IN ONE	PRIVACY SETTINGS	BRIDGE	OPTIMIZED ALGORITHMS
tools and documentation	platform with database and finance	hanged by user only	between internet eras	to reduce consumption and pollution

3

PRODUCT

Unit is a Layer 1 blockchain made to expand opportunities for everyone

4

UNIT COVERS ALL AREAS OF THE MARKET

~$247.1b market size
**World computation**

~$13.61b market size
**dApps**

UNIT

World database
~$83.41b market size

UNIT BENEFITS

~ $0.18 per transaction
~ $0.04 per GB
Pay only as long as
you need

DeFi compatible
Delegated gas fee
dSoc
Games & entertainment
and infinitely more

Optimized storage
Optimized language
Less power
consumption
PoS
Low gas price

SCALABILITY	LOW COST	SECURITY & PRIVACY	WIDE RANGE OF POSSIBILITIES	AVAILABILITY	EFFICIENCY

100,000+ TPS
Own virtual machine
Real time
Parallel computations

AES-256 encryption
Mnemonic support
End-to-end encryption
User can change privacy
options

Bridge between WEB 2.0 &
3.0
User-friendly interface
Accessable documentaion
Ease of use

HOW DOES IT WORK

FOR REGULAR USER IN 4 EASY STEPS:

01	02	03	04
CREATE WALLET	**UPLOAD FILES**	**SET PRIVACY OPTIONS**	**SHARE DATA**

HOW DOES IT WORK

FOR DEVELOPERS:

◢ NO NEED FOR THIRD-PARTY TOOLS

Unit provides all instruments to build your ideas.

◢ FLEXIBLE THEIA PROGRAMMING LANGUAGE

Inspired by Java, Python and C++. Brings a new way of programming smart-contracts and dApps.

◢ CODE MESS ABSENCE

Tired from connecting lots of externals? Forget about it.

◢ POWERFUL THEIA VIRTUAL MACHINE

Theia VM can be scaled for any case. It supports off-chain and on-chain solutions.

USE CASES

SUPPLY CHAIN MANAGEMENT:

Businesses can easily and securely track the movement of goods through their supply chain.

MEDICAL RECORD MANAGEMENT:

With Unit, healthcare providers can create a tamper-proof record of patient medical history, including diagnoses, treatments, and test results.

PERSONAL DATA PROTECTION:

With the growing concern over data privacy, Unit can offer a secure way for individuals to store and share their personal data.

FOR EVERYONE:

USE CASES

DIGITAL ASSET OWNERSHIP:

People can have true ownership of these assets and trade them in a secure and transparent manner.

TICKETING AND EVENT MANAGEMENT:

Ticketing and event management is a complex process. With Unit, event organizers can create a more transparent and secure system for ticket sales and events.

TRANSPARENT ROYALTY PAYMENTS:

Unit can also be used to create a more transparent and fair system for royalty payments in the entertainment industry.

FOR ENTERTAINMENT INDUSTRY:

USE CASES

DECENTRILIZED SOCIAL NETWORK:

UNIT PLATFORM ENABLES THE CREATION OF TRULY DECENTRALIZED SOCIAL NETWORKS

With features like delegated fees and merged data storage, users can experience dSoc as a communication tool akin to WhatsApp or Telegram, all while enjoying the benefits of a fully decentralized network.
USE CASES

ARTIFICIAL INTELLIGENCE:

UNIT IS TAKING AI TO THE NEXT LEVEL

With Unit, you have the power to teach global neural network with world data. By leveraging the power of our advanced blockchain, you can train neural network to adapt and learn in real-time, using the latest data from across the globe.

DATA COMPRESSION & FILE PRICE

	OBJECT SIZE		GAS PRICE		DIFFERENCE
	compression		compression		10,710,000.00

COMPETITORS

	DECENTRALIZED STORAGE	FILES CAN BE CHANGED BY OWNER	ACCESS RIGHTS FOR FILES	REAL-TIME FILE EXECUTING	PAYMENT DELEGATION	OFF-CHAIN VERSION OF VIRTUAL MACHINE
UNIT	➕	➕	➕	➕	➕	➕
(TON)	➕	➖	➖	➖	➖	➖
(Filecoin)	➕	➖	➖	➖	➖	➖
(a)	➕	➖	➖	➖	➖	➖

15

TOKENOMICS

The initial total supply of Unit tokens (UNT) at mainnet is 21 million tokens. UNT will have 10 digits of precision as part of the fraction where the minimal value is called a Decima.

CATEGORY	% OF INITIAL TOKEN DISTRIBUTION	INITIAL TOKENS
Commuinity	51.00%	10,710,000.00
Core Contributors	16.00%	3,360,000.00
Foundation	16.50%	3,465,000.00
Investors	16.50%	3,465,000.00

BUSINESS MODEL

Key partners

- Strengthen company ties inside the supply chain
- Shared network
- Elimination of lengthy processes
- Strengthen data integrity
- Facilitation of payments

Key activities

- Transfer business process
- Peer to peer network
- Data storage
- Computation power

Key resources

- Verification
- Documentation audits
- Code audits

Value proposition

- Verifiability
- Access new products
- Faster transactions
- Less expensive
- Smart contracts
- Less third-party apps
- Decentralized storage
- AI

Customer relationships

- More transparency
- Automation
- Self-service
- No middlemen

Channels

- New channels
- New SDKs, APIs

Customer segments

- Reach new customer segments
- Reach new customers

Cost structure

- Reduce search costs
- Reduce negotiation costs
- Reduce transaction costs
- Increase IT/software costs

Revenues

- Storage revenues
- Transaction revenues
- Service revenues
- Crowd funding
- AI revenues

17

REVENUE

Storage stacking — Q3 2023: 18000\$, Q4 2023: 71000\$, Q1 2024: 95000\$, Q2 2024: 285000\$

Token stacking — 2023: 40000 Units, 2024: 52500 Units, 2025: 60000 Units, 2026: 63000 Units

AI usage — Q3 2023: 100000\$, Q4 2023: 200000\$, Q1 2024: 350000\$, Q2 2024: 500000\$

18

ROADMAP

Q3 2023 — Finalization of the Virtual Machine development and release beta version of the decentralization.

Q4 2023 — Release final version of the decentralization without Shard-nodes. Completion of the work on Shard-nodes and test- ing them in the Test-Net.
Q1 2024 — Shard-nodes release.

Q3 2024 — ZK-Rollup. Anonymity.

TRACTION

✓ Blockchain MVP

✓ Mnemonic phrase for wallets

✓ Transactions

✓ P2P Protocol Beta

✓ Database for Smart Contracts

✓ Theia Language Beta

✓ Theia Virtual Machine Beta

TEAM

We are students of Moscow university on applied math and informatics faculty.

KIRILL
Founder, Developer
- Backend developer in 2-NFT projects.
- Created desktop app for server management and updating routines

GEORGE
Founder, Developer
- Made smart-contracts for NFT projects
- Designed websites for WEB3.0

ALEXANDER
Developer
- Created a payment gateway for a WEB3 application

ILYA
Developer
- Created GPT-like neural network with Theia language.
- Co-founder of the NFT project.

SEED ROUND FUND-RAISE

$35,000

We are looking to raise $35k in this round. We will use this money for the development activity and marketing.

Servers	Developer	Marketing	Legal taxes*
$200/month	$4000/month	10% of the budget / month	18-20%

*In case of using a legal entity
